IEEE Mini-Grants
for
University Student Design Projects
with
Student Application Papers

US $500 Grants for Students with Additional
US $300 Mini-Grants for Faculty Mentors

The IEEE is offering Grants to both students and faculty mentors to help with student design projects with an industry standards component.* IEEE will publish the results as a Student Application Paper.

Requirements:

Student(s) beginning a design or development project will submit an Application and Abstract Summary describing the project, which includes:

1. Summarizing the project goal (i.e., what are you trying to build?)
2. Describing which standards are being considered to achieve the project goal?
3. Agreement to submit a final application paper for publication by the IEEE upon completion of the project.
4. Statement of endorsement from a faculty mentor.

Important Dates:

- Applications may be submitted for consideration at any time throughout the year.

- Next application deadline: **15 June 2011.**
  Final Student Application Papers are due within six months of approval of application.

For more information and to download an application

or contact stdseducation@ieee.org

* Examples of industry standards: IEEE 802.11 Standard for Wireless LANs, IEEE 11073 Standards for Health Infomatics, National Electric Safety Code, etc. For a list of IEEE groups working on industry standards, see http://grouper.ieee.org/groups/index.html. It is not necessary to use an IEEE industry standard.
