Summer Internships in Autonomous Robotics

Applications are invited from outstanding undergraduate students not yet in their final year of studies to undertake **10-week research projects** in Autonomous Robotics at NUI Maynooth, Ireland.

The goal of the Summer Internships in Autonomous Robotics (SIAR) is to engage students in research projects which focus on the technological issues surrounding autonomous humanoid robotic soccer.

Internships are available for a period of 10 weeks, commencing on 7th June 2010. Successful students will receive a **scholarship of €300/week**. Support for travel costs is also available for international students. A full social programme is in place as well as seminars and tutorials in areas such as scientific writing, patenting and presentation skills.

The internships are available to selected students studying a bachelor's degree in Computing, Electronic Engineering, Applied Mathematics or other related disciplines.

Further information on the SIAR Programme and application instructions can be obtained at <http://www.nuim.ie/robocup>.

Completed applications must be emailed to siar.ureka@nuim.ie.
The closing date for applications is **6th February 2010**.
