

PHOEBE Research and Innovation Ltd

3-month Internship Position: *Python Software Developer*

Who we are: We are a company that builds innovative products and web services for the international market.

Who you are: You are a passionate programmer who loves exploring new concepts. You also love *Python*!

Why us? Build innovative solutions, expand your programming skills and be trained by an experienced team!

Job Description

- Collaborate with our team, to build innovative software for the international market.
- Cultivate your passion for programming and your love for Python, using frameworks (such as Django) for web services.
- Opportunity to learn and work on different levels of the web development stack (back-end and front-end, e.g. using ReactJS and AngularJS)
- Gain experience in developing RESTful API.
- Contribute in our team's knowledge-sharing environment.

Company Description

- PHOEBE Research and Innovation Ltd has been established in 2016 in Nicosia (Strovolos) and is already very active and efficient, based on the long experience of its founders.
- The company creates innovative solutions for energy-efficient systems' monitoring, control and optimization, exploiting state-of-the-art research outcomes within industrial applications.

How to apply

- Please, contact us at jobs@phoebeinnovations.com and send us your CV, describing your background and qualifications, past projects, etc,
- No prior experience necessary, however being active within open source software communities, programming competitions (such as IEEEExtreme) and projects, or sending us examples of your projects, are pluses.

- Applicants should be members of IEEE. To join IEEE [click here](#).

Hiring details

- 3-month internship. Payment terms: €1,000-1,250 per month (gross), depending on qualifications.
- Opportunity to extend to a full-time contract for a one-year period.

Deadline for applications: 15 June 2017
